

ASSIGNMENT-5

1. What is the importance of sketching ?
2. What is the design principles?
3. What is rgb color space ?
4. Is creating a sketch of website is a good practise ?
5. What is dark web ?
6. What is tor browser ?

Answers

1. Sketching is a powerful process to use because it always helps discover the best ideas and solutions to a design problem. It is a difficult task to 'freestyle' a complex design out of midair without hashing out the details. This is why sketching will remain an important step in the design and development process.
2. The elements, or principles, of visual design include Contrast, Balance, Emphasis, Movement, White Space, Proportion, Hierarchy, Repetition, Rhythm, Pattern, Unity, and Variety. These principles of design work together to create something that is aesthetically pleasing and optimizes the user experience.
3. A particular color space that uses the RGB color model is defined by the three chromaticities of the red, green, and blue additive primaries, and can produce any chromaticity that is the triangle defined by those primary colors. ... RGB is an abbreviation for red–green–blue.
4. Yes , creating sketch of website is good practise because it always helps discover the best ideas and solutions to a design problem.
5. The dark web is part of the internet that isn't visible to search engines and requires the use of an anonymizing browser called Tor to be accessed.
6. Tor is free and open-source software for enabling anonymous communication. ... Tor directs Internet traffic through a free, worldwide, volunteer overlay network consisting of more than seven thousand relays to conceal a user's location and usage from anyone conducting network surveillance or traffic analysis.
